

## Standard Operating Procedures

# Bulk Breakfast Burritos 4.5 oz.

Burritos are cook-and-serve products and should be cooked to an internal temperature that reaches or exceeds 161°F. Equipment performance may vary, adjust time and temperature accordingly.

### What You'll Need:

- Bulk Burritos (frozen)
- Plastic gloves
- Tongs
- Thermometer (clean & sanitized)
- Suggested burritos toppings: shredded Cheddar cheese, cheese sauce, salsa or hot sauce.

### Storage:

Product may be stored frozen for up to 15 months from the 5-digit manufacture date on the case. The first two digits indicate the year (2015 in example shown). The last three digits indicate the day of the year (125th day in example, or May 5th).

### Quality Check After Cooking:

- Use a sanitized pocket thermometer to ensure that core temperature has exceeded 161°F before serving.
- Hold for up to 3 hours as long as core temperature remains above 140°F. Discard if below 140°F.
- Discard burritos that are excessively cracked or dried out.

### Grab & Go:

After cooking, place burritos on a disposable plate or tray. May be served immediately, or held for up to 3 hours as long as core temperature remains above 140°F. As an option, allow customers to top burritos with desired garnish from a condiment bar.

### Full Service:

Dress burritos to order with customer's desired toppings from condiment bar. Suggested burritos toppings: shredded Cheddar cheese, cheese sauce, salsa or hot sauce.

### CONVENTIONAL OVEN

- Preheat oven to temperature shown on chart.
- Place 6 burritos on a cooking sheet that has been lined with parchment paper or lightly coated with cooking spray.
- Place in preheated oven for time shown in chart.
- Cook for 18 minutes, flip and cook for 18 more minutes.
- Temperature of the meat filling must exceed 161°F. Use a pocket thermometer for accuracy.
